"n/a" Used when the information accessed indicates that a cell should have an entry but no estimates could be made.

"0" Used when no evidence of the schemes to which the cell relates exist. Some estimates yielding a ratio below 0.04% are also shown as '0'.

Large external resources may lead to high THE /GDP ratio in some countries

The numerators are extracted from the OECD Health Data (update October 2007) and adjusted as necessary based on correspondence with national sources.
