

# Conversations for Health

A new website designed to help improve physician-patient communication, address the overuse of antibiotics, and develop parenting skills.

Visit [conversationsforhealth.com](https://conversationsforhealth.com) to engage in practice conversations with virtual humans and build your skills to manage real-life health conversations. All simulations are available at no cost.

We encourage you to experience the conversations, use them to build skills and change behaviors, or to conduct further research. Please share your feedback with us and the site with your colleagues.

## PRIMARY CARE CONVERSATIONS

### For Healthcare Professionals

Play the role of the physician talking to a virtual patient. See how well you do in building trust, collaborating on a treatment plan, and addressing the patient's request for antibiotics.

### For Patients and Consumers

Play the role of the patient talking to a virtual physician. Learn about the proper use of antibiotics, how to make sure you get answers to your questions, and leave the office with a plan that works for you.

## FAMILY SUPPORT CONVERSATIONS

### For Family Support Providers

Play the role of the family support provider. Learn to coach a single parent on how to read with her son.

### For Parents with Children 2 to 5 Years Old

Play the role of the parent. Learn how to manage the behavior of your 2- to 5-year-old child during common stressful situations.

All simulations are available at no cost.
