Universal, quality, lifetime and affordable health insurance: A roadmap that won’t bankrupt us
Presenter Disclosures

The following personal financial relationships with commercial interests relevant to this presentation existed during the past 12 months:

“No relationships to disclose”
Objectives:

1. Discuss the challenges facing the current US health care system with regard to costs, access, quality, choice and a lack of primary care.

2. Compare the strengths and weaknesses of the Affordable Care Act (ACA) and Single Payer (Medicare-for-All).

3. Understand the principles underpinning a single-payer National Health Insurance program, in particular its cost-effectiveness and administrative efficiency.

Patient Protection and Affordable Care Act

From Wikipedia, the free encyclopedia

The Patient Protection and Affordable Care Act (PPACA), commonly called the Affordable Care Act (ACA) or colloquially Obamacare, is a United States federal statute signed into law by President Barack Obama on March 23, 2010. Together with the Health Care and Education Reconciliation Act amendment, it represents the most significant regulatory overhaul of the U.S. healthcare system since the passage of Medicare and Medicaid in 1965.

The ACA was enacted to increase the quality and affordability of health insurance, lower the uninsured rate by expanding public and private insurance coverage, and reduce the costs of healthcare for individuals and the government. It introduced mechanisms like mandates, subsidies, and insurance exchanges.[1][2] The law requires insurance companies to cover all applicants within new minimum standards and offer the same rates regardless of pre-existing conditions or sex.[3] In 2011 the Congressional Budget Office projected that the ACA would lower both future deficits[4] and Medicare spending.[5]
Health Insurance Reform Under the ACA

10 essential benefits, but no standard benefit package
(Outpatient, ED care, inpatient care, perinatal, Mental health/substance, prescription meds, rehab, lab tests, preventive services, pediatric care including dental/vision)

Eliminates co-pays and deductibles, but only on preventive services

Limits insurers’ overhead to 15-20%, but lobbying has weakened enforcement

No regulation of premiums, deductibles and co-pays

Out-of-pocket caps
Impact on the Uninsured

- Reduction of uninsured from 46 million to 33 million between 2010 and 2014

- Expansion of Medicaid (14 million), despite 19 states opting NOT to expand their Medicaid programs under ACA

- Individual coverage purchased through exchanges (4.1 million)

- Reduction of uninsured children from 7.5 Million to 4.8 million between 2009-2014

Source: U.S. Census Bureau, 6/16/2015
Impact on 
The Under-insured

• 31 million Americans are still underinsured

• 44% of the underinsured went without a doctor’s visit, medical test, or prescription due to cost

• 51% had problems paying medical bills or were paying off medical debt over time

Note: Underinsurance defined as having out-of-pocket costs over 10 percent of household income, or having a deductible over 5 percent of household income.

Source: Collins et al., “The problem of underinsurance and how rising deductibles will make it worse,” Commonwealth Fund, 5/20/15
Impact on Medical Bankruptcy

- No change for 75% of medically bankruptcy filers who have insurance.

- Medical bankruptcies in MA have gone up not down since their mandate model was passed and implemented.
Proposed Cost Control Provisions

- Insurance exchanges
- Health information technology
- Comparative effectiveness research
- Fraud and abuse prosecution/recovery
- Alternatives to F-F-S (experiments)
- Coverage of preventive services
- Tax on “Cadillac” coverage
- Malpractice reform (experiments)
- Medicare advisory board
Proven Cost Control Provisions
ACA Makes Underinsurance the Norm (Average Employer Plan Paid 87%)
NY State Cheapest Bronze Plan (Family)

- Premium: $10,539
- $6,000 deductible
- 50% coinsurance after deductible for:
  - Ambulance, ED, Urgent Care
  - Imaging & diagnostic tests
  - Outpatient visits
  - Chemotherapy
  - Inpatient
- Out-of-pocket maximum: $12,700 for a family with income-based adjustments …
ACA Will Increase Insurance Overhead by $266 Billion Over 10 Years

Insurance overhead ($ billions)

Source: Himmelstein & Woolhandler analysis of data from CMS Office of the Actuary
Summary of ACA

- Increased reliance on private insurance companies
- Expansion of Medicaid, but not to all states
- Fewer uninsured, but still 27 M uninsured and 31 M underinsured
- Still unaffordable to Millions
- Increased bureaucracy, paperwork, and administrative overhead
- Increased rather than decreased cost
Public opinion
"Would you prefer the current health insurance system... or a universal coverage program like Medicare that is government-run and financed by taxpayers?"

Pie chart showing:
- Current: 40%
- NHI: 56%
- Don't Know: 4%

Source: ABC News Poll/USA Today/Kaiser Survey 9/06
Many Who Oppose Obamacare Prefer Single Payer

Favor 43%
Oppose - Too Liberal 35%
Oppose - 16%
Not Liberal Enough

Figures don't add to 100% because some had "no opinion"
Support for Governmental Legislation to Establish NHI, 2007 and 2002 by Specialty

Single Payer
A National Health Program for the U.S.
The 4 principles of single payer:

- Access to comprehensive health care is a human right.
- The right to choose and change one's physician is fundamental to patient autonomy.
- No corporate profit and personal fortune.
- In a democracy, the public should set overall health policies.
Single Payer NHI guarantees:

- Comprehensive Care
- Quality
- Choice
- Affordability
Single payer NHI includes:

- Automatic enrollment - everyone receives a card assuring payment for all needed care
- Free choice of doctor and hospital
- Doctors and hospitals remain independent, negotiate fees and budgets with public agency
- Public agency processes and pays bills
- Financed through progressive taxes
- Costs contained through capital planning, budgeting, quality reviews, primary care emphasis
Single payer NHI covers every American for all lifetime medically-necessary services:

- primary care and prevention, prescription drugs, long term care, mental health, substance abuse treatment, dental services, vision care, acute, rehabilitative, home care, occupational health care, durable and non-durable medical supplies, and public health measures
Prescription Drugs and Supplies

- NHI would pay for all medically necessary prescription drugs and medical supplies, based on a national formulary.
- NHI would negotiate lower prices with the drug companies.
- NHI would establish and regularly update the formulary.
- NHI would provide all Americans with full coverage for necessary drugs and supplies.
Payment for Physicians and Outpatient Care: 3 Options

• fee-for-service, or

• salaried positions in institutions receiving global budgets, or

• salaried positions within group practices or HMOs receiving capitation payments
Head to head: ACA vs. Single Payer

<table>
<thead>
<tr>
<th></th>
<th>Single-Payer Bill, H.R 676</th>
<th>Affordable Care Act</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Universal Coverage</strong></td>
<td><strong>Yes.</strong> Everyone is covered automatically at birth.</td>
<td><strong>No.</strong> About 30 million will still be uninsured in 2022 and tens of millions will remain underinsured.</td>
</tr>
<tr>
<td><strong>Full Range of Benefits</strong></td>
<td><strong>Yes.</strong> Coverage for all medically necessary services.</td>
<td><strong>No.</strong> Insurers continue to strip down policies and increase patients’ co-payments and deductibles.</td>
</tr>
<tr>
<td><strong>Savings</strong></td>
<td><strong>Yes.</strong> Redirects $400 billion in administrative waste to care; no net increase in health spending.</td>
<td><strong>No.</strong> Increases health spending by about $1.1 trillion over 10 years. Adds further layers of administrative bloat to our health system through the introduction of state-based exchanges.</td>
</tr>
<tr>
<td><strong>Cost Control/Sustainability</strong></td>
<td><strong>Yes.</strong> Large-scale cost controls (negotiated fee schedule with physicians, bulk purchasing of drugs, hospital budgeting, capital planning, etc.) ensure that benefits are sustainable over the long term.</td>
<td><strong>No.</strong> Preserves a fragmented system incapable of controlling costs. Gains in coverage are erased by rising out-of-pocket expenses, bureaucratic waste and profiteering by private insurers and Big Pharma.</td>
</tr>
<tr>
<td><strong>Choice of Doctor and Hospital</strong></td>
<td><strong>Yes.</strong> Patients will be allowed free choice of their doctor and hospital.</td>
<td><strong>No.</strong> Insurance companies continue to deny and limit care and to maintain restrictive networks.</td>
</tr>
<tr>
<td><strong>Progressive Financing</strong></td>
<td><strong>Yes.</strong> Premiums and out-of-pocket costs are replaced with progressive income and wealth taxes. 95 percent of Americans will pay less for care than they do now.</td>
<td><strong>No.</strong> Continues the unfair financing of health care whereby costs are disproportionately paid by middle- and lower-income Americans and those families facing acute or chronic illness.</td>
</tr>
</tbody>
</table>
Single payer is much more than a concept.

House Resolution 676
5 sections and only 11 pages

http://thomas.loc.gov
How Do We Know It Can Be Done?

• Every other industrialized nation has a healthcare system that assures health care for all

• All spend less than we do; most spend less than half

• Most have lower death rates, more accountability, and higher satisfaction

• No country has ever adopted single payer, found it to be worse, and switched back
